

Commercial & Industrial Energy Audit Rebate Program

UP TO
\$2,000
REBATE
FOR
COMMERCIAL/INDUSTRIAL
ENERGY AUDITS

Hancock-Wood Electric Cooperative's Commercial & Industrial (C&I) Energy Audit Rebate Program offers member businesses funding for the completion of professional energy audits. Energy audits help identify potential areas for energy efficiency upgrades and can help commercial members save hundreds of dollars a year on electricity costs.

Additional rebates are available for businesses that install energy efficiency improvements recommended by the audit.

SPECIFIC REQUIREMENTS:
Pre-approval of the project is required prior to the audit. Pre-approval is obtained through the submission of a completed application form. The application must

include the contractor's detailed quote with the project cost estimate. The proposed audit must be completed by a professional auditing or engineering firm and must include an audit of electricity use.

Once the audit has been completed, businesses must submit a copy of the auditing company's final invoice and the completed audit. A rebate of 50 percent of the total cost—up to a maximum of \$2,000 per audit—will be issued when all requirements have been met. Energy audit rebates are restricted to one audit per business facility within a five-year period.

*Hancock-Wood's rebate on C&I energy audits is limited. The offer expires when funds are depleted on a first-come, first-served basis, or when the program is discontinued.
